Applied Acoustics **42** (1994) 387–388

Contents of Volume 42

Number 1

1 A New Acoustical Mass Meter: Simulation Results
D. BOTTELDOOREN (Belgium)

13 Room Acoustic Parameters in a Physical Scale Model of the New Music Centre in Eindhoven: Measurement Method and Results
M. M. BOONE & E. BRAAT-EGGEN (The Netherlands)

29 Using Maekawa's Chart to Calculate Finite Length Barrier Insertion Loss
Y. W. LAM (UK)

41 A Note on Measurement of Sound Intensity with Windscreened Probes
F. JACOBSEN (Denmark)

55 A Fundamental Consideration on Evaluating Noise Produced by Road Traffic Controlled by Traffic Signals
S. YAMAGUCHI, Y. KATO & S. ISHIHARA (Japan)

75 Design and Evaluation of an Impact Noise Laboratory
C. JOHANSSON (Sweden)

Technical Note

85 Shotshell Primer Impulse Sources
C. G. DON, A. J. CRAMOND. I. D. McLEOD & G. G. SWENSON (Australia)

95 Book Review

97 Calendar

Number 2

99 On the Modelling of the Effect of Ground Terrain Profile in Environmental Noise Calculations
Y. W. LAM (UK)

125 A Time Series Approach on Reverberation of Large Enclosures
D. SKARLATOS (Greece)

137 Community Noise in Different Seasons in Kuopiao, Finland
E. A. BJÖRK (Finland)

151 Natural Frequencies and Modes for the Flexural Vibration of a Cracked Beam
H. P. LEE & T. Y. NG (Singapore)

165 Acoustic Properties of Fibrous Materials
N. VORONINA (Russia)

175 A Digital Shearing Apeckle Interferometry Technique for Model Analysis
T. W. NG & F. S. CHAU (Singapore)

Applied Acoustics (**42**) (1994)—© 1994 Elsevier Science Limited, England. Printed in Great Britain

Technical Note

187 Measurements of Attenuation and Dispersion in an Airborne Suspension of Dust
S. MOSS & K. ATTENBOROUGH (UK)

197 Calendar

Number 3

199 Calculation of Low-Frequency Ground Vibrations from Railway Trains
V. KRYLOV & C. FERGUSON (UK)

215 Sound Absorption by Pseudostochastic Diffusers Schroeder Diffusers)
H. KUTTRUFF (Germany)

233 Relation between Auditory Source Width in Various Sound Fields and Degree of Interaural Cross-Correlation: Confirmation by Constant Method
M. MORIMOTO, S. SUGIURA & K. IIDA (Japan)

239 Noise Generated by Simulated Rainfall on Profiled Steel Roof Structures
J. McLOUGHLIN, D. J. SAUNDERS & R. D. FORD (UK)

257 Vibration and Buckling of a Stepped Beam
H. P. LEE & T. Y. NG (Singapore)

267 Large Amplitude Response of Rectangular Plates Subjected to Transient Loads
M. I. QAISI (Jordan)

Technical Note

277 On the Accuracy of Ray Tube Model Predictions for Realistic Meteorological Conditions
M. WEST, J. D. TURTON & I. D. TODD (UK)

291 More Precise Formulas for Steady-State and Reverberating Fields in Rectangular Rooms
M. SHELUKHIN (Russia)

385 Announcement

386 Calendar

Number 4

299 A Prototype Active Noise Reduction In-Ear Hearing Protector
E. A. GOODFELLOW (UK)

313 Simulation of the Response of Multiple Microphones to a Moving Plant Source
B. CHAMPAGNE (Canada)

333 Application of a Vibro-Acoustic Reciprocity Technique to the Prediction of Sound Radiated by a Motored IC Engine
J. ZHENG, F. J. FAHY & D. ANDERTON (UK)

347 Vibration Characteristics of Thin Cylindrical Panels
K. Y. LAM & C. T. LOY (Singapore)

361 A Second Order Accurate Numerical Prediction Scheme for the Spherically Symmetric Flow Field Produced by an Explosive Source
P. CAINE & M. WEST (UK)

Technical Note

373 Sound Insulation of Different Types of Shutters Used in Jordan
R. N. S. HAMMAD, A. A. MUSTAFA & M. K. ABDELAZEEZ (Jordan)

383 Announcements

386 Calendar
